Projects

Project Phoenix
- This project focused on allowing users to rent a car at ease. It involves logging in, reserving a car either by paying cash or by card and the admin can have access to edit cars or delete cars. This used HTML, CSS, Servlets, and had a stack as a data structure

Golden Palm Grand Hotel
- This project focuses on building a hotel reservation system for weddings where couples can book their hotel based on their preferences and send RSVP forms to guests. The admin can access and edit the details based on it. This project used HTML, CSS, React, and SQL as a database.

Volunteer Experience

- AIESEC – Incoming Global Talent Team Member
- IEEE EMBS – Cell Spell as Program Team Co Lead
- IEEE PES – Robomesh as Finance Team Member
- SLIIT SIS – OSYSSEY Organizing Committee
- SLIIT FCSC - Batch Representative, Student Innovator at Exhibition
- Member of SLIIT Gavel
- Member of SLIT Rotaract
- Member of SLIIT SEDS
