AI / ML + FINTECH

Mohammed Zakee

Zakee Nowfal · Third-year Artificial Intelligence student at SLIIT

Interested in AI/ML and fintech roles. I combine hands-on project development with strategic partnerships and fintech project leadership.

SELECTED PROJECT WORK

Verity — Solo project

Built to make collecting Google Maps business information and images easier, with review analysis, charts, and exports in the repository. Python / Flask / Playwright / Next.js. Eight focused sentiment behavior checks passed; no real-world accuracy metric is claimed.

Read case study · Source code

Smart Greenhouse — Team project

Collaborated on an ESP32 and sensor-based system to automate greenhouse functions, including a water pump, fan, and lighting. The documented sensor set includes DHT22, LDR, soil-moisture, and ultrasonic sensors.

Read case study · Hardware photos and measured reliability results are not yet published.

FINTECH LEADERSHIP

Strategic Partnership Executive · Fintech Digital · Aug 2025–present
Project Lead — QChat Pay · Fintech Digital · Nov 2025–present
Project Lead · Fintech Association of Sri Lanka · Feb 2026–present

---

TECHNICAL FOUNDATION

Python · JavaScript · React · Node.js / Express · MongoDB / MySQL · AI/ML fundamentals · ESP32 / IoT · Git / GitHub
