High School

Sri Lankan International School Jeddah

IGCSE - 2A*'s and 6A's

ALs - Chemistry, Physics and Maths

2024 - Present

University

SLIIT

BSc. Hons in Information Technology Specializing in Artificial Intelligence

EXPERIENCE

Feb 2026 - Present

FASL (Fintech Association of Sri Lanka)

Project Lead

As the project Lead of the Fintech Association of Sri Lanka, my role is to create and organise events for the entire banking and finance companies in Sri Lanka. By having a very supportive team with me, I am able to organise such events and bring in engagement and networking between the sectors.

Aug 2025 - Present

Fintech Digital Pvt Ltd

Strategic Partnership Executive

At Fintech Digitals, I lead strategic partnership initiatives to expand market reach, drive innovation, and enhance digital solutions. I build and manage relationships with financial institutions, industry leaders, and technology partners, while identifying new business opportunities and structuring collaborations that support growth and deliver value across the fintech ecosystem.

Aug 2025 - Nov 2025

Project Lead of Singapore Fintech Festival

As Project Leader for the Singapore Fintech Summit, I facilitate Sri Lankan startups' participation on a global stage by identifying high-potential companies and enabling their exposure to international markets, fostering growth and cross-border collaboration in the fintech industry.

May 2025 - Present

British Council

Exam Invigilator

Currently working as an Invigilator at the British Council, ensuring the secure and fair conduct of international examinations. I manage exam setup, verify candidate identities, handle materials, and supervise sessions in line with strict standards and safeguarding policies, while maintaining a professional environment and upholding integrity.

- SLIIT SIS – Convocation Volunteer

PROJECTS

Project Phoenix

This project focused on allowing users to rent a car at ease. It involves logging in, reserving a car either by paying cash or by card and the admin can have access to edit cars or delete cars. This used HTML, CSS, Servlets, and had a stack as a data structure

Golden Palm Grand Hotel

This project focuses on building a hotel reservation system for weddings where couples can book their hotel based on their preferences and send RSVP forms to guests. The admin can access and edit the details based on it. This project used HTML, CSS, React, and SQL as a database.
